

Team Details

- Team Name: SkillChain
- Team Leader: Ashish Raj
- Team Members: Abhayjeet Kumar
- Track Chosen: AI / Future of Work / Talent Intelligence

Problem Statement

- The global freelance ecosystem lacks **trust and skill verification**.
- Hiring relies on resumes and keyword filtering rather than real skill measurement.
- Fake skills and inflated profiles reduce trust in talent platforms.
- Workers lack structured guidance for skill growth.
- No reliable infrastructure exists to continuously verify and upgrade skills.

Fake Resumes

Keyword Job Matching

High Platform Fees

\$1T Freelance Economy

Proposed Solution

- SkillChain: AI-powered career protocol
- AI Proof-of-Skill Engine using real tasks
- AI Talent Matching with vector similarity
- Portable Career Passport for verified reputation
- AI Skill Growth Roadmaps

AI Talent Platform – System Architecture

Innovation & Uniqueness

- AI-based skill verification instead of resume validation
- Vector similarity matching for precise job alignment
- Portable digital career identity
- AI-driven skill gap detection and learning roadmaps

Traditional Hiring

VS

AI Skill Verification & Vector Job Matching

Implementation Approach

❖ Tech Stack:

- Frontend: React / Next.js
- Backend: FastAPI / Node.js
- AI: LLMs + Vector Embeddings
- Database: Vector DB

❖ Workflow:

- User → AI Skill Test → Skill Score → Job Matching → Learning Roadmap

AI Platform – Tech Stack

Impact & Future Scope

- Impact:
 - ✓ Reliable hiring through verified skills
 - ✓ Faster job matching with AI intelligence
 - ✓ Transparent reputation system
- Future:
 - ✓ AI career copilot
 - ✓ Enterprise skill verification APIs
 - ✓ Integration with learning platforms
